Art Unit: 2653

1) The amendment/preliminary amendment filed 5/14/2004 is acknowledged.

2) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

3) (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4) Claims 1-3,8,11,13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by WATANABE (5,499,252).

The rejection in previously Office action (Paper No.8, paragraph (5)) is repeated herein.

5) The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

6) Claims 4-7,9,10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over WATANABE (5,499,252).

The rejection in previously Office action (Paper No.8, paragraph (7)) is repeated herein.

Art Unit: 2653

7) Applicant's arguments filed 5/14/2004 have been fully considered but they are not persuasive.

Applicant states that the prior art (WATANABE) does not disclose nor suggest for setting the sub-code data whenever the data of a predetermined unit is out put from a buffer. Applicant is directed to WATANABE's figure 1, the error correcting portion 14 which is use for detecting and correcting code error of CD-ROM data (column 4, lines 46-61), in another words, the sub-code will be adjusted, changed and corrected whenever data is output from buffer RAM 18. This feature is equivalent with "setting sub-code " as claimed.

For that reason, the claims are still rejectable as shown above.

8) THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire *THREE MONTHS* from the mailing date of this action. In the event a first reply is filed within *TWO MONTHS* of the mailing date of this final action and the advisory action is not mailed until after the end of the *THREE-MONTH* shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the

Art Unit: 2653

statutory period for reply expire later than *SIX MONTHS* from the mailing date of this final action.
